

**Position Purpose:**

We are looking for a top-quality developer who is passionate about design and the user experience: Design, implement, test, and maintain high volume, dynamic web applications. We are looking for a JavaScript expert to take a prominent role on a 20+ person development team. If you enjoy creating polished fit & finished user experience applications this is the opportunity for you! This position requires a strong attention to detail and you will work directly with our product team to create the user experience. You will be working in a SCRUM team in an agile environment.

**Essential Duties & Responsibilities:**

- Work with domain experts to translate business requirements into high quality working software.
- Add new scalable features and functions for a large number of concurrent users
- Apply modern usability concepts and best practices to create intuitive applications with simple workflows
- Develop new features using JavaScript, HTML, CSS.
- Assist in special projects as needed

**Essential Knowledge, Skills & Abilities:**

- Experience working with JavaScript, HTML and CSS
- Experience with JavaScript frameworks (especially ExtJS, node.JS, etc)
- Research and application of new technologies and development tools

**Other valued skills include:**

- Development experience in an Agile/Scrum environment
- Experience with HTML5, CSS3
- BDD (Behavior Driven Development) and TDD (Test Driven Development) using testing frameworks such as Jasmine, QUnit, etc.
- Experience in coordinating usability testing and reporting results from such testing
- Experience with software version control systems
- Mobile platform development experience
- Team leadership experience
- Working in a SaaS (Software as a Service) business environment

**Experience and Educational Requirements:**

- Experience in web development using above technologies
- Minimum 2 year degree in computer science.
- Four-year degree preferred

**Physical Demands & Work Environment:**

- Sits at a desk for long periods of time
