# iSqFt® takeoff

Accurate takeoffs. Now.

iSqFt® Takeoff is the next generation takeoff software program, providing a powerful application for performing digital takeoffs. With easy navigation and an intuitive layout, takeoffs are now faster, more accurate and efficient.

Accurate and competitive estimates are critical to your profitability. iSqFt Takeoff improves profitability in the estimating process from both paper drawings and other applications.

The easy-to-use layout and new features cut time with multiple plan views and automatic functionality, allowing you to bid more jobs.

iSqFt Takeoff improves turnaround time from plan view to takeoff to estimate

Key Benefits

Perform faster, more accurate takeoffs

- ▸ Load multiple drawings at one time for quick access
- ▸ Turn layers on and off to reference materials
- ▸ Simply point and click to calculate area, linear, and count
- ▸ Send quantities to Microsoft® Office applications to eliminate repetitive data entry

Increase Efficiency

- ▸ Differentiate between plan revisions using the overlay feature
- ▸ View multiple plans at one time to easily review specifications
- ▸ Integrate seamlessly with iSqFt

Save Money

- ▸ Decrease costs associated with purchasing and printing plans
- ▸ Reduce estimating time
