

iSqFt Toolbox²

iSqFt Toolbox² is the next generation of our popular Toolbox product. This software provides iSqFt users with a powerful, yet easy-to-use tool for performing takeoffs directly on files taken from the Private Construction Office or Internet Plan Room applications.

Toolbox² introduces a number of improvements over its predecessor—providing you with the advancements you have come to expect from iSqFt.

With iSqFt Toolbox², on screen takeoffs have never been so easy.
